

Yes, it's cloth. Yes, it works. And yes, it's beautiful!

The little cloth mask that changed the world of sleep therapy.

Simple & Elegant:

Mask. Connector. 3-point headgear. One size fits most. Nothing else to it.

Proven Technology:

SleepWeaver brand of lightweight soft cloth masks has been in use for years. The mask of choice for users that are tired of hard, heavy, plastic masks.

Zzzephyr Seal:

The secret is in the seal. A special cloth material that gently inflates like a balloon to achieve a seal around the nose.

Loose Fit Headgear:

Traditional hard plastic mask straps can be pulled uncomfortably tight to get a good seal. SleepWeaver soft cloth masks seal with loose fitting straps – it's just a better way to sleep.

Nothing Breathes Like Cloth:

Special breathable cloth design eliminates fogging common in hard plastic masks. Keeps skin dry and comfortable.

Lightweight:

What could be lighter than a thin piece of cloth?

"This is my second SleepWeaver mask. I would use no other."

Brian S.
CPAP User
Lawrence, KS

"Best mask I've ever used!"

Patricia H.
CPAP User
Deltona, FL

"I love the fact that moisture is not held against the face. The fabric allows the mask to breathe."

Robert A.
CPAP User
Dallas, TX

"It is so light and less cumbersome than any other mask yet!"

Susan F.
CPAP User
Houston, TX

"Love your soft mask, sleep with it every night."

Scott M.
CPAP User
Newburgh, NY

Accommodates Eye Glasses:

For those who want to read or watch TV while in bed, SleepWeaver Advance allows users to wear eye glasses with the mask on.

The Joy of Soft Cloth:

No one can deny user preference for soft cloth against their face as opposed to rubber, silicone and other gels. Cloth masks eliminate the need for a cushion or nasal pad.

Continuous Improvement:

SleepWeaver Advance has come a long way, incorporating the latest feedback from user groups and online social networks.
